

REGIONAL FISHERIES
COALITION

THE UNIFIED VOICE OF WASHINGTON'S 14 RFEGS

Perseverance & Grit

A passion strong enough to overcome obstacles.

"I have watched kids who grow up planting trees, mature right alongside the trees they steward. And as they grow, from schoolchildren to young adults, they learn that restoring salmon habitat is a long-term process."

-RACHEL VASAK, RFC BOARD PRESIDENT

Regional Fisheries Coalition 2020-2021 Annual Report

Addressing the most critical issues in salmon recovery:

- ✓ HABITAT
- ✓ EDUCATION
- ✓ ENHANCEMENT
- ✓ MONITORING

For more than 30 years, the 14 Regional Fisheries Enhancement Groups (RFEGs) that make up the Regional Fisheries Coalition (RFC) have partnered with community members in the regions where we work to restore vital salmon habitat.

Together, we have been steadfast in our determination, and creative in our approaches. We've taken inspiration from the salmon themselves, returning to their spawning grounds despite myriad challenges along the journey.

Celebrate with us, and learn more about the successes our collective grit has brought, here in our 2020-2021 Annual Report. Visit our digital report for more project highlights, financials, photo gallery, and more:

30+ YEARS OF RESULTS
FOR SALMON

86,000,000
Fish Released

944
Fish Passage
Projects Completed

1,316
Miles of Stream
Opened

1,655,000
Volunteer
Hours

4,182
Salmon Projects
Completed

1,125
Miles of
Restoration

"RFEs exemplify how federal and state entities can partner with local communities to implement priority restoration projects."

-Nick George, Washington State Coordinator, U.S. Fish and Wildlife Service, *Partners for Fish and Wildlife* program

2020-2021 Project Themes

RESILIENCE: Our communities are often at risk to natural processes like flooding, wildfires, and rivers that move. By working with partners, we find on-the-ground solutions that serve the goals of both our communities and our salmon.

RURAL ECONOMIES: RFEG construction projects employ local businesses to provide a wide range of family-wage jobs, including heavy equipment operators, truckers, accountants, landscape architects, biologists, planners, and engineers.

LOCAL RESPONSIVENESS: Being community-based, RFEs quickly address threats and embrace opportunities. RFEs are nimble, local organizations that often form strategic partnerships to tackle emerging issues.

2020-21 Funding: State & Federal Dollars Matched 1:8

State and federal RFEG funds – administered by WA Department of Fish and Wildlife and the US Fish and Wildlife Service – provide seed money, helping us take projects from ideas into action, bring together partners, write grants, and train staff. We further leverage this funding, securing an additional \$8 for every \$1 received, greatly amplifying the initial investment.

2020-21 By the Numbers

974,000
Fish Released

159
Miles of Restoration

67
Miles of Stream Opened

83,000
Volunteer Hours

19
Fish Passage Projects Completed

65,000
Carcasses Distributed
